

Sign language (also **signed language**) is a language which, instead of acoustically conveyed sound patterns, uses visually transmitted sign patterns (manual communication, body language) to convey meaning—simultaneously combining hand shapes, orientation and movement of the hands, arms or body, and facial expressions to fluidly express a speaker's thoughts.

Are you interested in learning conversational sign language and information about deaf culture?

will be hosting FREE courses on Thursdays, in partnership with the Maryland School for the Deaf Foundation

January 12th—March 9th, 2012 from 6:30—7:30 PM

at Shockley Honda, 7400 Shockley Drive, Frederick MD
